Nicholas Pitsakis
Checkpoint 2 Report

1. WorkDivision: I am still working by myself (I've tried reaching out four times to my assigned partner but haven't heard back so I'm proceeding completely alone), so all of the work has been done by me.

2. WeeklyLog:
10/10/2026: I've been further working on the components in Verilog.
10/18/2026: I finished writing all the components required by the project in Verilog.
10/19-24/2026: Plan on working testing the Verilog code I've written and starting the top level structural CPU code that connects all the behavioral components.
